The second question Choose the correct answer for each of the following:

1. When using the Clone Tool, press the ... key on the keyboard

(Alt-shift - Ctrl - Enter)

2. Use the ....tool to create a gradient using the foreground color and the background color.

(Zoom- Blend Tool - Smudge tool - Pencile tool)

3. .... is an open source program, which can be used on tablets. (Windows - Android - Mac - Linux)

4. .... is the way to direct user commands and instructions to the operating system

(Command Prompt - Operating System - CPU - Temporary Memory)

5. The computer's operating system is responsible for running.....

(Hardware components - software applications - storage units - all of them)

The second question put the word (true) in front of the correct statement and the word (false) in front of the wrong statement:

1. The Control Unit is one of the main processing units

2. The operating system acts as an intermediary between the user and its software on the one hand, and hardware components on the other

3. Speakers are the main input unit for dealing with menus

4. Freeware is software that is not authorized to be used except by purchasing the original version

5. The scanner is an input unit and an output unit at the same time

The third question Complete the following sentences with suitable words:

1. When you save a file for the first time, the function of the .... command is equal to that of the save as command

2. Keyboard hotkeys ....can be used to save the file

3. ....a set of data stored within storage media with different extensions and types

4. When you delete a file or folder, it moves to .... temporarily before deleting it permanently

5. One of the benefits of using .... data and software exchange between devices

The fourth question , give the appropriate scientific term for each of the following:

1. It appears at the bottom of the toolbox, showing the tool options selected from the toolbox.

2. It is an open source image processing program used to modify and create Fourth images and various graphic designs

3. We click on it to show the scenes so that we can learn more about the program interface components

4. The unit of measurement used to measure processing speed

5. Selection tool that is used to select similar areas of color in an image

Best wishes

mặhmŏud Ŷặśśíŋ

The Third question, arrange the following steps to change the name of a folder:

( ) Click on the folder with the right mouse button, the folder shortcut menu appears.

( ) Press the Rename button

( ) Enter the name of the new folder

( ) Click on the Rename command.

The Fourth question Match the statements of column (B) with the appropriate statements of column (A).

	A		B
1	Gimp saves an image file with the extension	A	to make it the current layer
2	A tool used to move an image, layer, or text	B	File
3	When drawing an oval, choose the selection tool	C	XCF
4	Click on the layer with the mouse	D	ELLIPSE
5	To create a new image file, choose the New command from the menu	E	Move Tool

.

Best wishes
măĥmŏud Ŷặśśíŋ

NAME :..CLASS:............ SCORE:..........

The first question arranged the following steps for copying a folder:

(   ) choose the command paste

(   ) Click on the folder with the right mouse button, the folder shortcut menu appears

(   ) Move to the new location (in the same storage medium or in another storage medium)

(   ) Choose the command Copy

(   ) Click on an empty space with the right mouse button, a shortcut menu appears

The second question Complete the following statements with suitable words:

1. The .... tool is used to fill the images with color.

2. ....can contain only files or files and subfolders

3.The ....network is a wide-ranging computer network (cities, countries, and continents)

4. We use the .... menu to switch between the two interface forms of Gimp

5. ....a component of the interface of Gimp

1. The image can be converted from RBG color mode to Grayscale mode

2. Open the Edit menu and choose Cut to remove a specific part of the image

3. Raster image is not an image type

4. The Fuzzy tool is used to cut out part of the image

5. Grayscale mode up to 256 shades of gray ranging from black to white

The Fourth question: Choose the correct answer from the brackets:

1. Grayscale mode is the mode (gray-red-blue-red)

2. A tool………… used to draw in a clear way (- - -)

3. One of the most popular uses of the tool is to edit and repair images (Clone-paintbrush-ink-Eraser)

4. The operating system….. is open source, and can be used on tablets(windows - android - mac - linux)

5. The vector image takes up storage space………

(large - small - hard disk - ram)

Best wishes
măĥmŏud Ŷặśśíŋ

NAME :...CLASS:............ SCORE:..........

The first question Complete the following sentences with suitable words:

1. To deselect all we choose None from the Menu ....

2. To merge all layers of the image into one layer, from the Image menu, choose the command........

3. When adding .... a text box is inserted that appears in the image window

4. There must be .... on the computer in order to run all kinds of programs and manage the components of the device

5. One of the most famous distributions of the Linux operating system is ....

The second question arranged the following steps for sharing a folder within Fedora:

( ) Click on the Sharing icon, the network settings settings window appears

( ) Press Personal File Sharing also on the On . mode

( ) Type the term Sharing in the search box, and the Sharing icon appears

( ) Click on the Share button at the top right of the window on the On . mode

( ) Click on Activates in the top bar of Fedora's opening screen

( ) Click on the Sharing icon, the network settings settings window will appear

The third question put the word (true) in front of the correct statement and the word (false) in front of the wrong statement:

1. The color mode of the image can be returned to RGB again after the image is converted to grayscale

2. To export an image file, open the File menu and choose the Save . command

3. Vector Image is a color mode

4. Indexed mode is one of color mode

5. The filter is used to help modify the appearance of the image.

The fourth question: Match the statements of column (b) with the appropriate statements of column (a).

A			B
1	Mixes the current color with the surrounding colors	A	
2	To add a new layer	B	
3	To make the layer invisible	C	
4	To make a color gradient	D	
5	It is used to enlarge the image to see the details of the image more clearly	E	

Best wishes

măĥmŏud Ŷặśśíŋ

The Third question, arrange the following steps for using the Blend Tool:

(   ) Make a color gradient by clicking and dragging inside the image window.

(   ) Create a new file

(   ) Choose the Blend Tool

(   ) Choose the direction of the gradient

Fourth question: Put the word (true) in front of the correct statement and the word (false) in front of the wrong statement:

1. The color mode RGB consists of three primary colors (white, black and gray)

2. To cut the selected layer, open the EDITE menu and select COPY

3. GRAYSCALE MODE is A color mode

4. The MOVE TOOL is used to enlarge the image to see the details of the image more clearly

5. Image types are RASTER IMAGE and VECTOR IMAGE

Best wishes

măĥmŏud Ŷặśśíņ

The third question: Choose the correct answer from the following brackets:

(F1 - WINDOWS - Toolbox - Layer Box - TEMPLATE)

1.................a component of the GIMP interface

2. To restore one of the closed boxes or tabs, such as the toolbox, we use the list…................…….

3. List .... includes pre-made templates with image dimensions and resolutions

4. By clicking on .... and showing the assistant, you can learn about the components of the program interface

5. .... contains many tools such as selection tools and foreground and background color tools

The fourth question: Match the statements of column (b) with the appropriate statements of column (a).

A		B	
1	Rectangle Selection Tool	A	
2	ELLIPSE : Oval Shape Selector	B	
3	LASSO : Freeform Selection Tool	C	
4	FUZZY (MAGIC WAND)	D	
5	INTELLIGENT SCISSORS	E	

Best wishes

mặĥmŏud Ŷặśśíŋ

The first question put the word (true) in front of the correct statement and the word (false) in front of the wrong statement

1. Cd-dvd is a storage unit

2. Software from the hardware components of the computer

3. It can run all kinds of different software without installing an operating system software on the computer

4. Securing the password and distributing different powers to users is one of the most important functions of operating a computer

5. Mac os x is an open source operating system

The second question Complete the following sentences with suitable words

1. The second syllable of the file name is called file ...., and it distinguishes the type of file, and it usually consists of three letters

2. The selection tools appear in the toolbox and can be accessed from the menu...............and choose the Selection tool

3. To see the name of your computer, choose .... from the shortcut menu of the computer icon on the desktop

4. ....is used when making a modification to the file to save the modification in the same file with the same name.

5. A local network is a network that is limited in...............

The First question: Write the scientific term or concept that indicates each of the following statements:

1. It is called volatile memory or random access memory

2. An electronic device that stores and processes data by performing arithmetic and logical operations

3. One of its benefits is the exchange of data and programs between devices

4. It manages the hardware components of a computer and runs all kinds of software and applications

5. It equals 1024 GB

The second question: Complete the following statements with suitable words from the brackets:

   (Image Background - Input Units - Layers - Hz - Rename)

1. .... through which data is entered into the computer to perform processing operations on it

2. To rename the folder, choose the command......... from the folder's shortcut menu

3. Processing speed is measured in a unit called..........

4. The bottom layer of an image layer that represents.........and the rest of the image layers come above it

5. The .... tab is used to modify, add, and control the different layers of the image

The First question: Choose the correct answer for each of the following:

1. The GRAYSCALE image appears after pasting in a new layer...... The color image layer. (Bottom - Top - Background - IMAGE)

2. Color mode......... Very suitable for images and graphics that are displayed on the computer screen and used in web pages

(RGB - GRAYSCALE - RASTER-INDEXED)

3. .... gives the file an extension of XCF when saving and all the image information (layers - transparency..etc) is saved.

(PHOTOSHOP - MSWORD - MSEXCEL - GIMP)

4. To paste a copied part of an image, from the list...... Choose PAST AS

(FILE - EDITE - WINDOWS - IMAGE)

5. to deselect the selection Open the SELECT menu and choose ....

(YES – NONE – NO)

The second question Complete the following statements with suitable words from the brackets:

1. Open the FILE menu and select .... to save the modifications to the image

2. The image can be converted to INDEXED MODE color through the menu.............

3. GRAYSCAL MODE REACHES A .... gradation FROM BLACK TO WHITE

4. TYPES OF IMAGES, VECTOR IMAGE, and .... IMAGES

5. Uses the .... tool to enlarge the image to see the details of the image more clearly

1. The SCALE tool is used to change the image area (height / width)

2. The PAINTBRUSH tool is used to draw in a clear way

3. All mobile operating systems are closed source

4. MAC OS X is for IBM devices only

5. Transferring data between the different units of the device and saving it on storage units is one of the most important works of permanent memory

The Fourth question Match the statements of column (B) with the appropriate statements of column (A).

	A		B
1	digital camera	A	1024 GB GBYTE
2	It installs the components of the computer	B	The system unit
3	One of the benefits of this is the exchange of data and programs between network devices	C	Motherboard
4	The primary physical component of a computer, including main memory	D	computer network
5	1 terabyte (TBYTE)	E	Input unite

Best wishes

mǎĥmǒud Ŷǎśśíŋ

The first question put the word (true) in front of the correct statement and the word (false) in front of the wrong statement:

1. To bring up the window containing all the computers connected to the network, choose the properties command from the shortcut menu

2. File sharing is the process of publishing digitally stored information such as documents or multimedia.

3. In the Windows operating system, to share files, they must be placed in a folder

4. In order for the file sharing process to be available in Fedora, the sharing settings must be set to off

5. When you open GIMP for the first time it is in SINGLE WINDOW MODE

The Second question: State the scientific term for each of the following:

1. Connect two or more devices through a wired or wireless medium to share resources

2. Choose to allow all network subscribers to share the folder

3. It is one of the types of networks in terms of range and is used on the scale of cities, countries and continents

4. An electronic device that stores and processes data

5. It equals 1024 bytes

The second   question Choose the correct answer for each of the following:

1. When using the Clone Tool, press the ... key on the keyboard

(Alt-shift - Ctrl - Enter)

2. Use the ………tool to create a gradient using the foreground color and the background color.

(Zoom- Blend Tool - Smudge tool - Pencile tool)

3. …………. is an open source program, which can be used on tablets. (Windows - Android - Mac - Linux)

4. ……….. is the way to direct user commands and instructions to the operating system

(Command Prompt - Operating System - CPU - Temporary Memory)

5. The computer's operating system is responsible for running.....

(Hardware components - software applications - storage units - all of them)

The second question put the word (true) in front of the correct statement and the word (false) in front of the wrong statement:

1. The Control Unit is one of the main processing units

2. The operating system acts as an intermediary between the user and its software on the one hand, and hardware components on the other

3. Speakers are the main input unit for dealing with menus

4. Freeware is software that is not authorized to be used except by purchasing the original version

5. The scanner is an input unit and an output unit at the same time

The third question Complete the following sentences with suitable words:

1. When you save a file for the first time, the function of the .... command is equal to that of the save as command

2. Keyboard hotkeys ....can be used to save the file

3. ....a set of data stored within storage media with different extensions and types

4. When you delete a file or folder, it moves to .... temporarily before deleting it permanently

5. One of the benefits of using .... data and software exchange between devices

The fourth question , give the appropriate scientific term for each of the following:

1. It appears at the bottom of the toolbox, showing the tool options selected from the toolbox.

2. It is an open source image processing program used to modify and create Fourth images and various graphic designs

3. We click on it to show the scenes so that we can learn more about the program interface components

4. The unit of measurement used to measure processing speed

5. Selection tool that is used to select similar areas of color in an image

Best wishes

mặĥmŏud Ŷặśśíŋ
